

## Front-End Developer at ADSOVO

Location: Paris, France

Type: Full-time

Experience: Mid-Senior level

Functions: Engineering, Design, Information Technology, Art/Creative

Industries: Internet, Computer Software, Marketing and Advertising, Computer Networking, Online Media

### Position Summary:

We're looking for a creative, experienced software engineer to help us design and build amazing new user interface functionality for our platform. ADSOVO is in the process of building a very large cross-platform networked software as a service (SaaS) application for the online advertising industry (B2B). You'll work with our web application teams at ADSOVO to create excellent user experiences for our internal and consumer facing products. We're looking for passionate engineers who can take a project, understand what will make a great user experience and then implement the functionality using PHP, Python and HTML/CSS/JS.

### Responsibilities

- Create standards-compliant, cross-browser compatible dynamic interfaces.
- Own our design standards and template strategy
- Take mockups from the UX+Design team and create rapid HTML prototypes of new products and projects
- Write clean, efficient, reusable code that the rest of the team can understand and adopt

### Requirements

- Proven experience building web application front-end.
- Great with HTML/CSS + Javascript skills, very strong with jQuery or other Javascript frameworks
- Comfortable coding in one (or more!) of these languages: PHP, Python, JavaScript.
- Strong understanding of UI and UX design principles, and how to use these to create user-centered applications.
- Passionate about what's possible with HTML5 and CSS3
- Strong desire to expand and improve software engineering skills
- Process-oriented with ability to work with different UI materials and rapid prototyping.
- Creative UI design sense and aesthetic.
- Excellent verbal and written communication and teamwork skills.
- Experience working in parallel group software development with both remote and local teams.
- Assertive self-starter with the ability to work in a resource limited and changing start-up environment. Must be willing to "roll up the sleeves" to get the job done under sometimes challenging circumstances.
- Must have permission to work in France.

### Pluses

- Experience displaying complex data in visually engaging ways
- Test-driven Javascript development with Jasmine, JUnit, or other testing frameworks
- Familiarity with frameworks like Zend, Symfony, Django, or Rails
- Experience developing applications that use NoSQL
- Online advertising industry experience
